1. INTRODUCTION

UCT Token and UCT Cash are innovative new cryptocurrencies, utilising the latest cutting-edge blockchain and market maker technology, for the purposes of creating wealth, restoring balance and empowering the self-governance of indigenous sovereign micronations.

The currencies are brought to you under Universal Community Trust, an independent, autonomous, government-free jurisdiction, where the rights of the individual are protected from the tyranny of the collective.

More specifically, UCT Token [UCT] is the first ERC-20 asset on the Ethereum and Polygon blockchains to represent tax-exempt, non-judicial common law damages pay-outs. Indeed, it is the very first credit-based token of its kind on any cryptocurrency platform.

UCT Cash [UCTC], its sister token, also an ERC-20 asset, is the UCT's own credit-based stablecoin, for use within the UCT's co-operative trade network and marketplace, in addition to providing matching liquidity in various pools in the DeFi marketplace. UCTC can also be spent in promissory note form.

2. UCT - A PRE-EXISTING COMMUNITY

Having been initially formed by the declaration of the founding sovereign, Michael O'Bernicia, in the summer of 2010, Universal Community Trust was formally created by international treaty on 21st June 2012.

The UCT Treaty was ratified by 25 autonomous, sovereign micronations, which exist within the jurisdiction of Universal Community Trust, under the guiding principles of Natural Law, and outside the jurisdiction of central government.

The UCT Treaty can be viewed here:

<https://www.universal-community-trust.org/UCT-treaty/>

In the spring of 2013, the UCT founders established a Memorandum of Understanding with her majesty's government, which laid out UCT's aims and objectives, including the intention to create and issue UCT currencies.

Read the Memorandum of Understanding here:

<https://www.universal-community-trust.org/memo-understanding-full/>

The UCT/UCTC community already consists of almost 5,000 people, whilst many others are in the process of joining our numbers across the world.

With a committed team of three dozen founding trustees and the eclectic autonomous micronations of indigenous people they represent, UCT Token and UCT Cash are in the unique position of already having their initial markets and a long-established community in place, before the assets are launched, in accordance with the following vision.

3. A CHALLENGING VISION

- To develop truly decentralised cryptocurrencies, offering unique benefits to both the UCT's community of autonomous micronations and potential investors in other jurisdictions.
- To utilise the very latest, cutting-edge technology, enabling development of the UCT currency project through all future technological advancements.
- To establish UCT Token and UCT Cash as valuable, stable, usable, and technically advanced, credit-based assets, in the increasingly crowded and chaotic DeFi marketplace.
- To create UCT Token [UCT] as a representation of the satisfaction and exchange of perfected common law liens, which will always correspond with the value of UCT in circulation.
- To create currencies which are digital representations of perfected liens and UCT promissory notes, which will be held in secure vaults, in order to provide reserves for a thriving UCT marketplace.
- To develop community-enabling cryptocurrency tokens which are easily exchangeable for other crypto, fiat, and for goods and services in the UCT marketplace, thus maximising usability, fungibility and flexibility.

4. FAST-TRACKED DEVELOPMENT

Out of the necessities which have arisen from increasingly tight economic and financial restraints of the current debt-based financial system, and recent unsustainable socially-engineered changes, UCT tokens were fast-tracked from concept to the first successful tests in just 21 days.

However, having researched and developed the infrastructure and jurisdiction required to launch the currencies over more than a decade, the Trustees of Universal Community Trust were quickly able to put together a dynamic, experienced and fearless team to fast-track their development.

5. TIMELINE - CONCEPT TO LAUNCH

02-06/05/2021 | Concept drafted by founder.

999,999,999,999 UCT ERC-20 tokens created on Dodoex.

07-11/05/2021 | Tests conducted by developers.

12-20/05/2021 | Web domain acquired, website in development, initial Dodoex liquidity pools tested.

UCT Token added to Metamask wallet and 1,700,000 UCT Token sent to development team in airdrop tests.

UCT Token worth GBP £207,075,200 from one perfected lien exchanged.

23/05/2021 | 999,999,999,999 UCTC ERC-20 tokens created on Dodoex.

24-31/05/2021 | 207,075,200 UCT Token and 207,075,200 UCT Cash were added to paired liquidity pools on Dodoex, pegged to a 1-1 value, as well as with ETH, DAI, BNT and other decentralised assets and stablecoins.

UCT community members received airdrops of 100,000 UCT Cash and successfully tested trading UCT Cash with UCT Token.

02/06/2021 | UCT Token and UCT Cash established total market liquidity of GBP £414,150,400 on the Dodoex platform.

September 2021 | Website for UCT currency project, uct-token.org, launched.

All UCT Treasury UCT and UCTC were transferred to the Polygon network, a sidechain of the Ethereum blockchain, for the numerous benefits Polygon offers, including lower gas fees and faster transaction times.

Exchange transactions with both UCT and UCTC, as well as with UCT/UCTC and other tokens and stablecoins, were tested successfully on Polygon network (Matic Mainnet).

5,001,500,000 UCT and the same amount in UCTC were locked into three UCT/UCTC exchanges on Dodoex by UCT Treasury to seed the markets, all of which was created by the issue of UCT promissory notes.

UCT and UCTC were also paired with WETH, WMATIC, DAI and USDC in additional exchanges on Dodoex. The initial price of both UCT and UCTC was set at the price of GBP£1 [\$1.38 at the time].

Both tokens were then listed on Coinpaprika, but the market immediately adjusted the price of UCT and UCTC to around \$24 per token.

September 2021 – February 2022 | Both tokens held their value at around the \$24 mark, even when all other cryptocurrencies,

save for DAI, USDT and USDC, lost in excess of 50% of their values in the market crash of January 2022.

More than \$1.6 billion worth of 24 hour volume was established on Coinpaprika, following six months of spot trades in the Dodoex liquidity pools.

07-28/02/2022 | Three pre-sales crowdpooling campaigns were launched on Dodoex, with generous bonuses payable in UCT upfront, which aimed to raise matching UCT/UCTC liquidity in WETH, DAI and WMATIC. Liquidity will be locked in for 180 days following the crowdpooling phase, with a phased withdrawal process in tranches of 5% over the next 180 days.

March 2022 onwards | Further crowdpooling campaigns aimed at both community and larger, outside investors will be launched, to raise more matching UCT/UCTC locked-in liquidity in other tokens/stablecoins. Liquidity pools will have UCT/UCTC added automatically, every time there is an exchange of paper (lien and/or UCT promissory note) for tokens.

Once sufficient liquidity has been raised through the crowdpools, small transactions will be tested, and if successful, as we fully expect them to be, UCT tokens will be officially launched.

6. FOUNDERS, BUSINESS PARTNERS & ASSOCIATES

FOUNDERS

The Trustees of Universal Community Trust.

BUSINES PARTNERS & ASSOCIATES

Dodoex | Since UCT Token and UCT Cash have been created on the Dodoex platform, the assets will register on all exchanges with which they are integrated.

Polygon | UCT Token and UCT Cash have been transferred to the Polygon network, and will be registered on Polygon.

Coinpaprika | The UCT tokens are listed on the Coinpaprika exchange.

7. BLOCKCHAIN CONTRACT ADDRESSES

Ethereum ERC-20 Token | Dodo Exchange
999,999,999,999 UCT Token [UCT] created on 02/05/2021
ETHEREUM CONTRACT ADDRESS:
0xcc7dcc3f649cb3932857d4edc6268e0ef4960995

999,784,175,434 UCT Token [UCT] transferred to Polygon on
01/09/2021
POLYGON CONTRACT ADDRESS:
0xfd5962484BE2c3574D70131BF5D452CcC7C69F67

Ethereum ERC-20 Token | Dodo Exchange
999,999,999,999 UCT Cash [UCTC] created on 23/05/2021
ETHEREUM CONTRACT ADDRESS:
0x2707ab358b5383d087fe4736da36c1c70179e3bd

999,790,315,355 UCT Cash [UCTC] transferred to Polygon on
01/09/2021
POLYGON CONTRACT ADDRESS:
0xD4b42287F1EE04aF246aD792153C39D62733f826

8. WALLET APP INFORMATION

Metamask | Secure and user-friendly browser app, which recognises all ERC-20 tokens and integrates with the Ledger Nano S hardware wallet.

9. SMART CONTRACT SECURITY

As Dodo app created ERC-20 tokens, UCT Token and UCT Cash's smart contract security will be provided by Dodo's state of the art exchange.

The tokens were subject to rigorous Security Audits before the launch of the crowdpooling and marketing campaigns.

10. MARKETING

The UCT Token website is <https://www.uct-token.org/>

All UCT community members will receive a regular newsletter with the latest updates on the release of UCT Token and UCT Cash.

11. PRE-ICO AIRDROPPED TOKENS

100,000 of each of the UCT tokens were airdropped into the wallets of each UCT trustee, prior to the planned ICO for UCT Token in the spring of 2022.

12. CORE TEAM & ADVISORS

Founding Trustee | Michael O'Bernicia

Head Developer | Mark Lyford

Trustee of Development | Kathryn Newey

Trustee of Business Affairs | Jamie Upton

Trustee of Legal Affairs | Michael O'Deira

Business Consultant | Olivier Castagne

Marketing Consultant | Craig Crawford

Marketing Consultant | David Shipley

Technical Advisor | Lloyd Bryant

Technical Advisor | Darron Hodgkinson
